STEP BY STEP GUIDE FOR CASH APP

Cash App is an incredibly quick and convenient way to send and receive cryptocurrency directly from your mobile device.

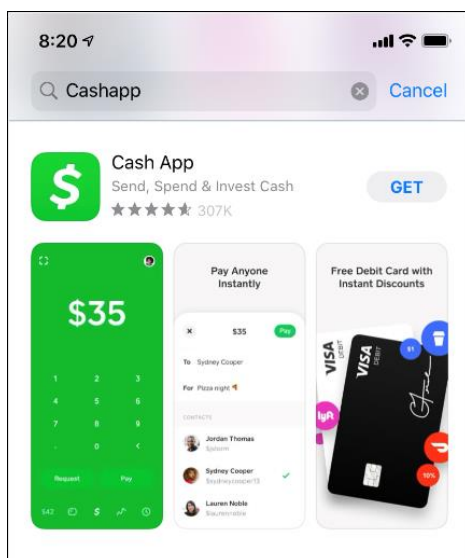

IMPORTANT: Verifying your Cash App account can take up to 48 hours. This only needs to be done once, and from that point on your transactions will be quick and easy. But, if you are in a hurry to use cryptocurrency for the first time, we recommend the Edge App which has a much quicker initial verification process.

This guide covers:

1. CREATING YOUR CASH APP ACCOUNT
2. FUNDING YOUR CASH APP ACCOUNT
3. BUYING BITCOIN
4. DEPOSITING TO BOOKMAKER
5. WITHDRAWING FROM BOOKMAKER

1) CREATING YOUR CASH APP ACCOUNT

To install Cash App on your mobile, just head to your App Store or Play Store and search for “Cash App”.

Install the app, then register an account by following these steps:

1. Enter your mobile phone or email

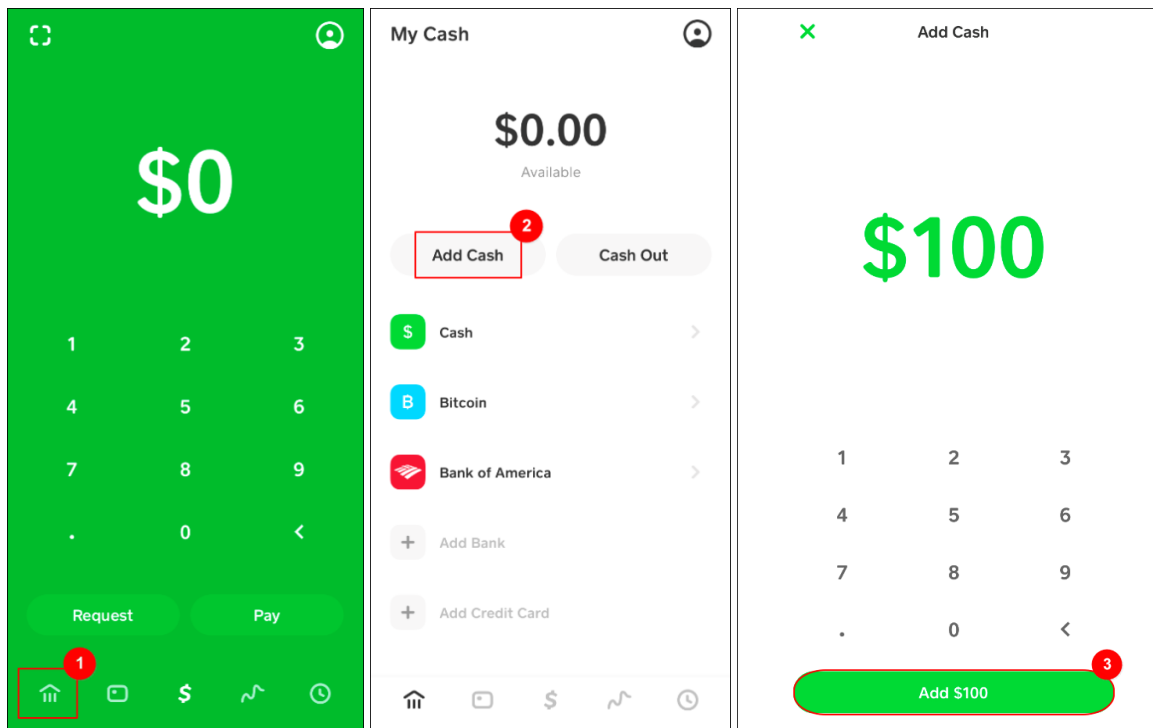

2. A confirmation code will be sent to you
3. Enter this code on Cash App
4. Link your bank by entering a debit card number
5. Enter first and last name
6. Select a personal “\$Cashtag” (a unique username for your account)
7. At this point you can invite friends to use the app, or skip this step

2) FUNDING YOUR CASH APP ACCOUNT

With your Cash App account set up, first you’ll need to load it with funds.

To do this, simply:

1. Hit the home icon  at the bottom left of your screen
2. Tap “Add Cash”
3. Enter an amount and tap the “Add” button at the bottom (the funds will be pulled directly from the bank account you linked upon sign-up)

4. On the following screens, you’ll need to confirm your name, date of birth, social security number and home address.

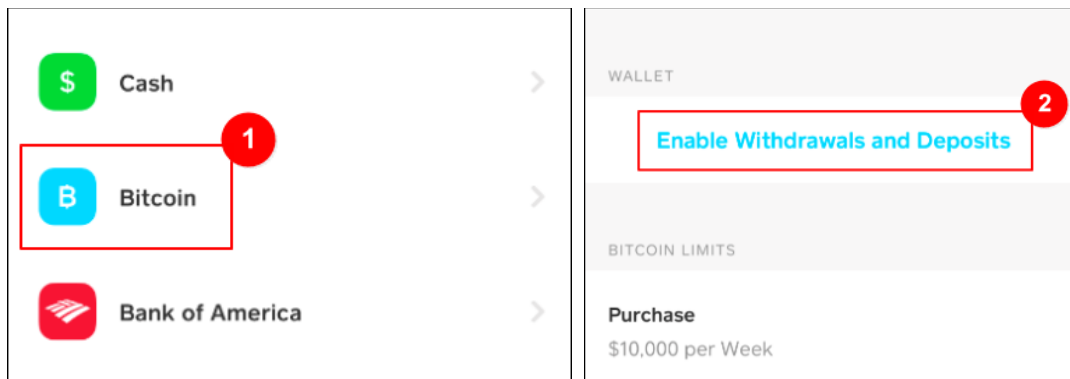

Complete these details and the funds will immediately be added to your Cash App balance.

3) BUYING BITCOIN

With your Cash App account funded, you're now ready to buy Bitcoin. If this is the first time you're using the app, you'll need to complete verification first. If you've already verified your account, you can skip this section.

VERIFYING YOUR ACCOUNT

1. From the app home screen, tap **"Bitcoin"**
2. Hit **"Enable Withdrawals and Deposits"**

3. Cash App will request additional details such as email, reason you are using bitcoin and questions about your income & employment
4. You'll be asked to verify your identity with a license or state ID, by scanning the front and back of your ID

NOTE: To use the scanner, you need to center your ID and place the edges of the scanner frame as close to the edges of your ID as possible. The sides of the frame will highlight blue when positioned correctly. When all four sides are blue, the photo will be taken automatically.

5. Last, take a clear, well-lit photo of your face

The app will begin processing your ID for verification. **This could take up to 48 hours.**

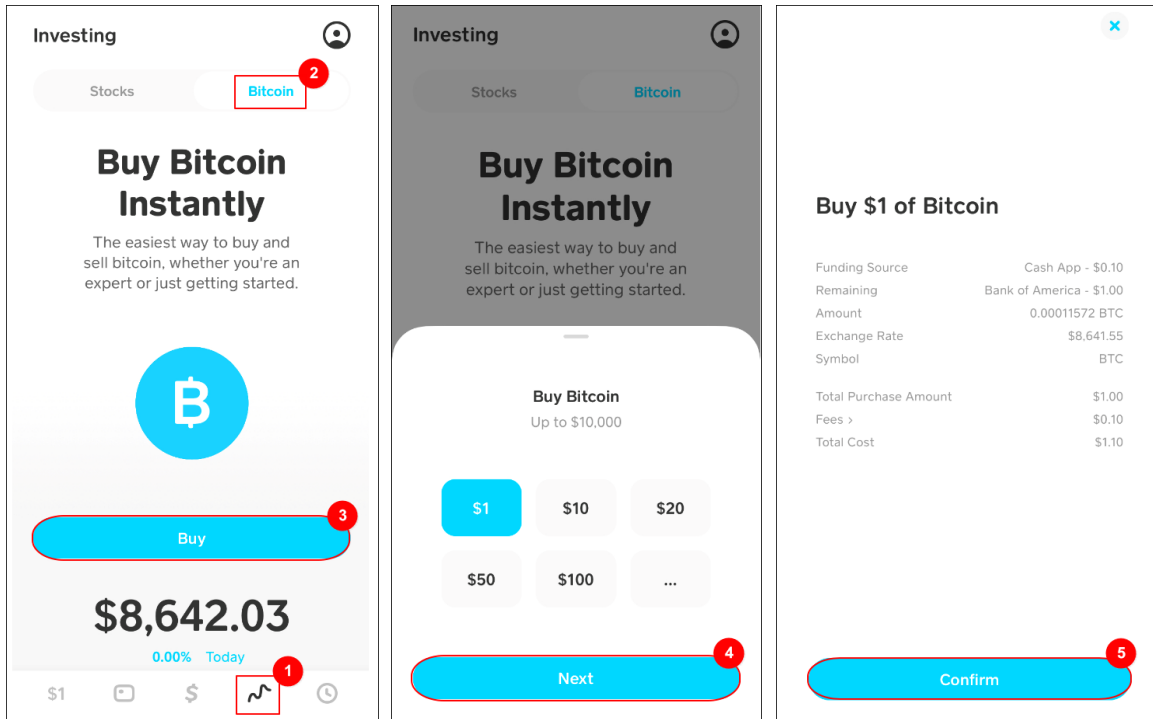

You will see the **"Verification in Progress"** message on your screen now. As soon as verification is completed, this message will be removed and you'll get an email and/or text message confirmation.

BUYING BITCOIN (ONCE ACCOUNT IS VERIFIED)

To buy Bitcoin, go to the **"Investing"** section of the app.

1. This is the wavy line (ticket tape icon) at the bottom of the screen

3. Hit the **"Buy"** button
4. Select an amount and hit **"Next"**
5. On the next screen hit **"Confirm"**

NOTE: If this is the first time you are buying Bitcoin, you will be asked to choose a 4-digit Cash PIN

1. Go to the **Home** tab of the app
2. Just below your cash balance, hit **“Cash Out”**

3. Confirm the amount, and hit **“Cash Out”** one more time
4. Choose **“Standard”** (takes about 3 days) or **“Instant”** (immediate, but for a fee)
